

AVAILABLE EARLY 2009

The first Canadian all inclusive reference book for
Health Information Management professionals

Fundamentals of Health Information Management

Published by the
Canadian Healthcare Association (CHA)
in collaboration with the
Canadian Health Information
Management Association (CHIMA)

Fundamentals of Health Information Management was written by experts in the health information management field and peer reviewed. The textbook is based on the latest research and covers CHIMA's three domains of practice. It features chapters on the Canadian health care system; health informatics; the legal aspects of health information practice; electronic health records; health information standards; ethics issues; and each chapter discusses the role of the HIM professional. It includes an index; a glossary of terms; a bibliography; and the CHIMA Code of Ethics.

With over 600 pages of text, graphics and references, this textbook is destined to become the premier reference for all HIM professionals in Canada.

- ✓ Must-have resource for all HIM professionals
- ✓ Essential reference tool for HIM departments
- ✓ Practical information for the HIM professional
- ✓ Essential tool for HIM educators and students
- ✓ Content based on CHIMA curriculum learning objectives
